

Network Engineer

Job Title:	Network Engineer
Company:	Abtec Network Systems Ltd
Department:	Technical
Location:	Market Harborough, Leicestershire
Salary:	£35 - £50k depending on experience, on call bonus and company profit share
Website:	www.abtecnet.com

Company Background:

Abtec Network Systems is a leading managed service provider, supplying businesses across the UK with cloud services, networks and IT infrastructure.

Job Summary:

We are looking for talented network engineers who are keen to further their careers. This is a varied role, in addition to providing our clients with second/third line network support, you'll be fundamental in the delivery of some amazing projects. It's a fantastic opportunity to acquire new skills and develop your engineering career.

Here are few examples of past and present projects:

- We designed, deployed, and managed the IT on a crucial element of Europe's biggest construction project.
- Designed, implemented and manage the IT infrastructure for a £1 billion Scottish shopping centre
- We are currently delivering the network infrastructure for a Premiership football club's new stadium including wireless "to the seat" within the stadium bowl.
- Multiple ongoing projects to deploy networks into new datacentres in the UK and Europe.

Key Responsibilities:

- Configure and deploy enterprise network infrastructure hardware
- Providing 2nd and 3rd line network support for Abtec's customers
- Providing high level and detailed network diagrams and keep documentation up to date.
- Managing and maintaining our core network and data centres.
- On site deployment and commissioning of equipment.
- Be a part of the on-call rota.

Abtec Network Systems Ltd

Barents House, Compass Point, Market Harborough, Leicestershire LE16 9HW

Tel: +44 (0)1858 438500

Fax: +44 (0)1858 438501

Email: enquiry@abtecnet.com

Experience requirements:

- Administration and configuration of routers, preferably Cisco.
- Knowledge LAN hardware and protocols (VLANs, STP, ACLs)
- Deploying and maintaining wireless networks.
- Understanding of WAN circuits: DSL/FTTC, Ethernet, Cellular
- Excellent network troubleshooting knowledge

Desirable knowledge

- CCNA/CCNP in enterprise infrastructure.
- Network protocols: OSPF, BGP, MPLS, L3VPN
- Firewalls: Cisco ASA, Firepower, Watchguard, Palo Alto
- Wireless networking: Cisco, Meraki or Aruba
- NAC solutions: Cisco ISE, Forescout, Aruba ClearPass
- Basic VMware knowledge
- Any scripting skills: PowerShell, Python, RestAPIs

We're looking for an engineer that will take ownership of the projects they are involved in. The ability to learn new products and technologies will be important. The candidate should also have excellent interpersonal, communication and organisational skills, as well as commitment to deliver a first class customer service.

An ideal candidate must also have the following:

- Full UK driving license
- Eligible to work in the UK
- Current Passport holder

Why work at Abtec?

- Tailored personal development plan
- Attractive salary
- Company profit share
- On call bonus
- Pension
- Free on-site parking
